

Kaiser Tile

Moves

A material-look tile collection for metal and marble [drive]; asphalt [run]; wood and brick [bike]

Moves is the newest addition to Kaiser Tile's Kollection which includes Sweet Sixteen, Stories, Species, in:stock and KT Accents. It is a material-look tile collection that includes a wide range of materials inspired by modern urban settings, reclaimed industrial buildings and spunky underground venues. Comprised of three segments, Drive_Run_Bike, the collection conjures notions of metal, asphalt, wood, marble and brick.

Drive_the metal and marble segment of the collection is inspired by old marble desktops, rust-covered surfaces, signs and plates usually found in classic auto workshops.

Run_is the asphalt segment of the collection and depicts the concept of a city as seen from its most metropolitan angle--its streets. It evokes the beauty and appreciation of an early morning run on asphalt that bears the marks left by rush-hour traffic.

Bike_is the wood and brick segment of the collection, inspired by sports halls' reclaimed wood flooring, bike racing tracks and white-painted brick walls.

Kaiser Tile stocks 15"x30" Drive in Cream, Mint, Sugar and Toffee. We are also stocking 10"x60" colors from Bike and the 10"x60" Bike Brick wall deco.
